PROFESSIONAL SUMMARY

Full Stack AI Engineer and product-minded builder with 3 years of experience delivering production-grade applications for government and private clients. Hands-on experience integrating LLMs, LangChain, RAG pipelines, vector databases, and agentic workflows into full-stack products. Strong across backend (Python/FastAPI, Node.js, REST APIs, PostgreSQL/MongoDB), frontend (React, Vue.js, Next.js, TypeScript), and cloud (Docker, AWS, CI/CD). Founder of an e-commerce business with proven customer discovery, product strategy, and cross-functional leadership. Passionate about building AI products that reach real users at scale.

CORE COMPETENCIES

AI / LLM: LLM integration, LangChain, RAG, vector databases, embeddings, prompt engineering, agentic workflows, multi-step reasoning, tool calling, model explainability (SHAP/LIME)

Backend: Python, FastAPI, Node.js, Express, REST APIs, WebSockets, PostgreSQL, MongoDB, SQL/NoSQL query optimisation

Frontend: React, Vue.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, dashboards, data visualisation, chat UIs

Cloud / DevOps: Docker, AWS (EC2, S3, RDS), Vercel, Netlify, GitHub Actions, CI/CD

Product: Product Roadmap Support, PRDs, Release Notes, Feature Planning, Backlog Grooming, Sprint Planning, Stakeholder Management, Requirements Gathering

Analytics & Research: Product KPIs, Funnel Analysis, User Behaviour Analysis, A/B Testing Concepts, Customer Discovery, Competitive Analysis, UX Audits

Tools: Git, GitHub, Jira, Trello, Notion, Firebase, Google Analytics (familiar), Excel, Figma

Methodologies: Agile, Scrum, Kanban, Cross-Functional Collaboration, Fast-Paced Delivery

PROFESSIONAL EXPERIENCE

One Network (FWO) | Full Stack Engineer

Islamabad, Pakistan | Jun 2026 – Present

- Build and maintain 3+ production-grade government applications serving 50,000+ users with 99.9% uptime.
- Design and implement RESTful APIs; integrate 5+ third-party services, enhancing application data capabilities.
- Reduced page load times by 40% through code optimisation, lazy loading, and efficient state management (Pinia/Vuex).
- Develop reusable, modular frontend components and scalable UI architectures with Vue.js, TypeScript, and React, reducing development time by ~30%.
- Collaborate with cross-functional teams of 8+ engineers, designers, and stakeholders to translate complex requirements into secure, scalable solutions.
- Support QA and UAT cycles for client-facing deployments; debug production issues and maintain quality standards.

- Work with product leads to scope features, define success criteria, and maintain product documentation.

Captain Hook PK | Founder & Owner

Remote | Jun 2023 – Present

- Founded and scaled an e-commerce business, owning product strategy, customer experience, branding, and operations end-to-end.
- Conducted 150+ customer discovery sessions to understand needs and identify pain points — directly shaping product decisions.
- Analysed market trends and customer purchasing behaviour to optimise product strategy and delivery.
- Grew sales to 20–30 monthly orders through digital marketing, personalised engagement, and continuous product iteration.
- Managed production workflows using Agile planning to balance demand, inventory, and delivery timelines.

Nayatel | Product Management Intern

Islamabad, Pakistan | Jun 2025 – Jul 2025

- Conducted market research across 10+ AI platforms and 5 cybersecurity vendors; proposed 3 AI-powered product concepts to leadership.
- Built and launched a full-stack MVP within 7 days using React, demonstrating rapid prototyping and execution capability.
- Developed a Watch Party MVP using React and Firebase with synchronized playback and chat functionality.
- Created product documentation, UX audits, cloud solution materials, and go-to-market recommendations.
- Presented product recommendations to leadership, showcasing strong technical communication.

CodingKey | Product Analyst

Islamabad, Pakistan | Jan 2024 – Aug 2024

- Analysed user behaviour and product performance data, contributing to a 15% improvement in user retention.
- Collaborated with engineering and design teams to translate business requirements into technical specifications and user-focused solutions.
- Supported UI/UX improvements through usability analysis, feature refinement, and feedback-driven iteration.
- Tracked development progress using Agile methodologies and supported timely product releases.
- Developed understanding of frontend, backend, and system architecture through direct collaboration with engineering teams.

KEY PROJECTS

Aegis — AI-Driven Threat Detection & Security Advisory Platform

Python, TensorFlow, PyTorch, FastAPI, XGBoost, CNN-LSTM, SHAP, LIME, Docker, LangChain, RAG, Vector DB

- Designed a hybrid ML model combining CNN-LSTM and XGBoost for network intrusion detection, achieving >99.5% true positive rate with near-zero false positives.
- Built data preprocessing, feature engineering, and model training pipelines using CICIDS2017, Kitsune, and DoH benchmark datasets.

- Developed a RAG-powered advisory chatbot using LangChain, vector databases, and LLMs for MITRE ATT&CK-mapped remediation.
- Integrated SHAP and LIME for model explainability, enabling analyst trust and interpretability.
- Deployed as fully containerized microservices using Docker; achieved sub-second inference at scale.
- Collaborated with a cross-functional team of 3 engineers and a supervisor to deliver a production-grade system.
- Presented at FAST's largest job fair; gathered user feedback and secured multiple interview invites.

RAG-FYP-Handbook-Assistant — LangChain, RAG, Vector Databases, LLMs, Python

- Built a RAG-powered document retrieval and knowledge management assistant.
- Designed efficient document ingestion, chunking, embedding, and retrieval pipelines.
- Demonstrated enterprise knowledge solution applicable to internal AI assistants.

AI Agent for Disaster Resource & Volunteer Allocation

Python, PuLP, Scikit-learn, Pandas, GeoPandas, Streamlit, Flask, NumPy

- Built a multi-agent disaster response system optimizing volunteer allocation across emergency zones.
- Applied integer programming (PuLP) with capacity and resource constraints.
- Used machine learning and geospatial analysis for intelligent resource distribution.
- Deployed an interactive Streamlit dashboard for real-time visualization

Chest X-Ray CNN — Pneumonia Detection

Python, TensorFlow, CNN, Scikit-learn, Matplotlib

- Developed a custom CNN architecture from scratch to classify chest X-ray images.
- Achieved 85.9% accuracy, F1-score 0.888, AUC-ROC 0.926.
- Experimented with data augmentation, regularization, and hyperparameter tuning.

Marka e Haq Parking Management System (One Network)

Vue.js, Vuex

- Contributed frontend development for a real-time parking platform handling booth operations at a major facility.
- Built role-based authentication, live dashboards for Car and Bike booths, and a complete ticketing system with QR-coded receipt generation.
- Designed a modern glassmorphism UI with responsive support for all devices.

Air Quality Monitoring System (One Network)

Vue 3, JavaScript

- Built a government operations platform for Punjab air quality — 44 ground stations across 41 districts — with real-time monitoring, US-EPA AQI derivation, rollups, alerts, analytics, and regulatory reporting.
- Developed a live WebSocket fleet-tracking and dispatch system for mobile water-cannon trucks, including ranked spray-site recommendation, route replay, and full mission lifecycle management.
- Implemented JWT auth + Django RBAC (Viewer/Operator/Admin) enforced end-to-end, with a Vue 3 SPA using Pinia, Tailwind, and Leaflet.

EDUCATION

National University of Computer and Emerging Sciences (FAST-NUCES)

BS, Software Engineering | 2022 – 2026

Relevant Coursework: Machine Learning, Data Structures, Algorithms, Database Systems, Operating Systems, Computer Networks, Formal Methods

CERTIFICATIONS

AWS Academy Graduate – Cloud Web Application Builder

AWS Cloud Quest – Cloud Practitioner

LEADERSHIP & VOLUNTEERING

Vice President — Sustainable Development Society, FAST-NUCES

Aug 2024 – Dec 2024

- Led and managed a team of 20+ members, fostering collaboration and efficiency.
- Organised impactful events including the BingX event at FAST-NUCES, enhancing student engagement.

Marketing Team Member — NaSCon

Jan 2023 – Mar 2023

Collaborated with a team of 20+ members to organise one of Pakistan's largest tech and sporting events.
